

Organic Fertiliser

New Era High P

Organic Seabird Guano Fertiliser

New Era High P is a high quality, high analysis granular fertiliser based on 100% mineralised natural sea bird guano. It provides a microbe friendly source of phosphorus and calcium for improved soil and plant health.

Certified input for organic farming

Nutrient levels in different guano vary, as there are a variety of suppliers, food sources for birds or bats and environmental constraints. Sea birds eat strictly small fish and are not scavengers providing a clean natural source of plant nutrients.

New Era High P seabird guano encourages better overall growth and fruit formation naturally. As a result, **New Era High P** encourages your plants to use sunlight more efficiently for healthier plants and more vigorous growth.

New Era High P also encourages microbial activity in the root zone.

New Era High P contains 32% calcium, which is important for soil pH, soil health and cell wall development in plants. Calcium also reduces the toxic affect from sodium and from soil borne fungi such as root rot and phytophthora.

Use as a pre-plant at 100 to 1t/ha.
(Confirm your crop requirements via soil analysis)

Typical Analysis: P- 15%, Ca - 32%, K - 0.12%, Mg - 0.1%,
Mn - 3.1%
