

## DIRECTIONS FOR USE

To prepare soil before planting rose bushes, and to maintain healthy growth and high quality blooms of established bushes.

**NEW ROSE BEDS.** When preparing beds, dig 250 grams of Rose fertiliser per bush in to good loam. Add no further fertiliser until roses are established.

**ESTABLISHED BUSHES.** Apply rose fertiliser at rate of 50 grams per bush, digging into soil circle at distance of 20cm from plants. Water well. Repeat as necessary.

**AFTER PRUNING.** Apply at rate of 250 grams per bush, digging into soil in circle at distance of 20cm from plant. Water well. Give further application of 50 grams per bush when buds burst and as necessary.
