

# David Grays NPK BLUE- SPECIAL

*David Grays NPK Blue Special is a quick and effective fertiliser, which helps to promote high yields to top quality flowers, fruit and vegetables. NPK Blue Special is also an ideal fertiliser for the use on palms.*

## **DIRECTIONS FOR USE**

### **Flowers:**

To promote top quality, colourful, strong healthy buds and flowers, use 30 grams of NPK Blue Special per square metre of soil, by digging into the flower bed and watering well. Repeat application every 4 - 6 weeks.

### **Fruit and Vegetables:**

To promote high yields of top quality, full-flavoured fruit and vegetables, prepare ground by adding 30 grams of NPK Blue Special per square metre of soil, watering in well. Repeat application every 4 - 6 weeks.

### **Palms:**

Palms thrive with David Grays NPK Blue Special. NPK Blue Special helps to promote long, lush healthy fronds. To apply, use 30 grams per palm of NPK Blue Special. Apply at a distance of 20cm around the circumference of the butt and water in well. To help sustain healthy palms, repeat application every 4 - 6 weeks.

Note — One small handful equals approximately 40 grams.
