

David Grays POTATO MANURE E

David Grays Potato Manure E is complete fertiliser for potatoes, vegetables, fruit, flowers and roses.

DIRECTIONS FOR USE

Potatoes:

When planting apply 50 grams per meter length of furrow, then feed at a rate of 50 grams per square meter monthly until harvest. Water in well.

Vegetables and Flowers:

Apply 100 grams of Potato E every 6 weeks per square meter and work into topsoil. Water in well.

Roses, Fruit Trees and Shrubs:

Apply at a rate of 200 grams per plant, around the circumference of the plants, at a distance of 20cm from the trunk. Water in well. Apply every 6 weeks from September to April.

Note — One small handful equals approximately 40 grams.

REGISTERED ANALYSIS

NITROGEN (N)	5.0% w/w
PHOSPHORUS (P)	1.0% w/w
POTASSIUM (K)	8.0% w/w
N:P Ratio: 5:1
