Directions for Use:	This section contains file attachment.
Other Limitations:	
Withholding Periods:	

Trade Advice:	
---------------	--

General Instructions:	<p>GENERAL INSTRUCTIONS</p> <p>To apply the gel, remove the cap on the nozzle and touch the tip to the surface to be treated and slowly depress plunger until sufficient gel is dispensed. Recap the dispenser after treatment is completed.</p> <p>Where maintenance treatments form part of the professional pest controllers contract it is recommended that cockroach activity be monitored where gel has been applied one month after initial treatment or at more regular intervals in areas of high infestation.</p>
-----------------------	--

Resistance Warning:	<p>Insecticide Resistance Warning GROUP 22A INSECTICIDE</p> <p>Some naturally-occurring insect biotypes resistant to Overt Cockroach Gel Bait and other Group 22A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if Overt Cockroach Gel Bait or other Group 22A insecticides are used repeatedly. The effectiveness of Overt Cockroach Gel Bait on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, PCT Holdings Pty Ltd accepts no liability for any losses that may result from the failure of Overt Cockroach Gel Bait to control resistant insects.</p> <p>Overt Cockroach Gel Bait may be subject to specific resistance management strategies. For further information contact PCT Holdings Pty Ltd or a local agricultural department agronomist.</p>

SITUATION	PEST	RATE
Domestic, commercial and public service buildings including: farm buildings, food processing establishments, factories, hospitals, hospitals, homes, kitchens, offices, restaurants, retail outlets, storerooms, vehicles and other situations which fall within these definitions.	German, American and other common cockroaches.	<p>Apply at least 2 spots per m². Increasing the number of spots (up to 5/m²) may be required for heavy infestations or if the American cockroach is the main pest.</p> <p>Recommended spot size is approximately 5 mm diameter (0.1 g) or the size of the spot indicated below:</p> <p style="text-align: center;">•</p>
CRITICAL COMMENTS		
<p>Conduct a thorough inspection of the premises and then place gel in areas near cockroach harbourages or in sheltered areas where signs of cockroaches are evident.</p> <p>Replenish gel if previous application has been consumed or cockroaches remain a problem; increasing number of spots if necessary.</p>
