Pulse is an organosilicone based surfactant containing a unique blend of various polymers. Pulse is a highly efficient wetter/spreader/penetrant. Pulse is effective with most agricultural chemicals unless otherwise stated on the label.

While Pulse has been proven to be a highly efficient surfactant, timing, weather conditions, method of application and/or mixture with other chemicals not specifically recommended are beyond the control of the seller. Therefore, the user should carefully observe spray deposits, rate efficiencies, compatibilities and effectiveness in initial applications and adjust the adjuvant rate accordingly.
