POWERED BY POLYMER ENHANCED FORMULATION TECHNOLOGY.

ANTagonistPRO (launched in 2013 as Australia's first speciality purpose formulated outdoor ant treatment) incorporates innovative *Polymer Enhanced Bifenthrin Technology* to overcome harsh environmental factors that breakdown ordinary pyrethroid treatments.

ANTagonistPRO was scientifically developed specifically to meet the performance characteristics modern pest professionals demand.

ANTagonistPRO now boasts the broadest pest label claims of any bifenthrin product in Australia now making this the number one choice no matter what the situation.

CONTROLLING PESTS IN A GENUINELY DIFFERENT WAY.

ANTagonistPRO was designed with its polymer technology to afford the most robust treatment in a variety of outdoor harsh situations.

Standard chemical treatments are quickly broken down by:

- Ultraviolet rays from the sun
- Rain
- Heat from the sun
- pH of the surface the chemical is applied to

ANTagonistPRO represents leading research and development into cutting-edge formulation technology incorporating the only polymer enhanced bifenthrin available in Australia.

WEAPONS UPGRADE.

Over a period of 4 years, extensive research into key situations and significantly important pest application was conducted. The result is a vastly improved product label - the most extensive of any product of this class in Australia.

With ANTagonistPRO pest management professionals now have the most comprehensive market segments and pest situations covered in one pack.

COMBINING FUNCTIONALITY WITH GREATER FLEXIBILITY.

Pest management professionals demand products that can be applied to key pests in a number of flexible situations - one product that can do multiple tasks provides better efficiency.

Sundew Solutions undertook extensive field trials to vastly expand the pest profile for ANTagonistPRO, while developing other target application possibilities. The ANTagonistPRO label now boasts exciting new claims for:

- Turf Pests
- Roses, Carnations & other Ornamental Plant Pests
- General Pests
- Specific Termite uses

GREATER CONTROL OF MORE INSECTS.

ANTagonistPRO is now labelled to control more than 25 insects:

Turf Pests.

ANTagonistPRO is approved for ants, Lawn armyworm, Sod webworm, Argentine stem weevil, Billbug, and African black beetle adults.

Roses, Carnations and other Ornamental Plant Pests.

ANTagonistPRO is approved for treatment of Two spotted mite, aphids, caterpillars, Whitefly, Poinsettia white fly, mealy bug, plague thrips, and cutworms.

General Urban Pest.

ANTagonistPRO is approved for ants, spiders, wasps, cockroaches, mosquitoes, biting midges, fleas, flies and ticks.

Specific Termite Uses.

ANTagonistPRO is approved for protection of service and fence posts, as well as direct treatment for eradication of termite nests.

Better Performance. Better Value.

STRENGTH  FULL

PRODUCT SPECIFICATIONS

Active constituents: 80 g/L polymer enhanced bifenthrin

Formulation type: Suspension Concentrate

Use rate: Refer to product label for details

Chemical group: Pyrethroid

Schedule: S6

Pack sizes: 1 L and 5 L

Pest Claims: African black beetle, ants, aphids, argentine stem weevil, billbug, midges, budworm, caterpillars, cockroaches, corn earworm, cutworm, fleas, flies, light brown apple moth, loopers, lawn armyworm, mealybug, mosquitoes, plague thrips, sod webworm, spiders, termites, ticks, wasps, whitefly, two potted mite.
