### Features of Poachek

- For use on turf areas including golf courses bowling greens, sportsfields and lawns
- Safe on Buffalo, bent grass, Common Couch grass, QLD Blue Couch, NZ brown top rye
- Do not use on kikuyu or fescue
- Poachek is only a post emergent

### Get the best out of Poachek by following these tips

- Apply on dry turf
- Allow turf to dry for at least 24 hours before watering or rain. If you want to water day before.
- You want to wet the wintergrass do not soak it with the spray.
- You may need to re apply 2-4 applications every 10 - 14 days when the wintergrass is established and seedhead is present. Best to apply newly germinated weeds
- Do not mix with anything except Blazon (non staining dye spray indicator).
- If spraying for broadleaf weeds, spray a1-2 days before.
