SAFE HANDLING INFORMATION

STORAGE

Store in the original container in a cool, dry place, out of direct sunlight and out of the reach of children. Keep away from oxidising agents and alkalis as contact with alkalis will produce ammonia gas. Keep away from chlorinating agents such as pool chlorine (sodium hypochlorite and calcium hypochlorite) as explosive nitrogen trichloride may form if in contact.

TRANSPORT

Product is not classified as a dangerous good in accordance with the Australian Code for the Transport of Dangerous Goods by Road and Rail. Keep away from oxidising agents and alkalis.

SPILLAGE

Sweep, vacuum or shovel up spilt material and collect in a suitably labelled container. Wash down contaminated area with water. Product can be re-used if not contaminated.

DISPOSAL

Recycle by using as per the label directions, or by disposing in accordance with local regulations.

FIRE/EXPLOSION HAZARD

When heated, ammonium sulphate emits toxic fumes (oxides of ammonia and nitrogen sulphur gas). A potentially explosive mixture may form if mixed with pool chlorine.

FIRE FIGHTING EQUIPMENT:

Self contained breathing apparatus should be used.
